PEDRO F DA COSTA

PhD Researcher - Machine Learning Applied to Neurosciences

@ pedro.ferreira_da_costa@kcl.ac.uk London, UK linkedin.com/in/pedro-hpf-costa github.com/PedroFerreiradaCosta

EDUCATION

King's College London & Birkbeck College

PhD Researcher - Computational Neuroscience

April 2019 – April 2022 London, UK

Leveraging methods in **active sampling, autoML and Bayesian optimization** to build new tools for neuroscience research.

Building new computational models of learning based on **embodied agents and reinforcement learning**.

Imperial College London

C3NL

Jan 2018 – Sep 2018 London, UK

MSc Thesis - Visiting Student

Mark = 18/20

Instituto Superior Técnico

MSc in Biomedical Engineering

Oct 2016 – Sep 2018 Lisboa, PT

Mark = 18/20 (Hons)

Some included modules:

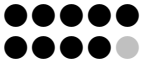
- Machine Learning
- Decision Support Models
- Health Informatics
- Information Systems and Databases

ACHIEVEMENTS

- Designed and **delivered lectures on Machine Learning** as part of MSc Neurosciences @ Kings College London
- Created, debugged, released and maintained a **scikit-learn compliant version of the RVM algorithm**.
- PAC2019 Predicting brain age competition- **Top 10 out of 79 teams**
- King's College Neuroimaging Hackathon (2019) - **1st Place**
- Kaggle APTOS 2019 Blindness detection - Top 30%
- Roller Hockey National University League - 1st Place (2015)
- Captained the Portuguese Floorball University Team in the World University Championship (2016)

SKILLS

Python, Tensorflow, scikit-learn, C#
Unity, ML Agents, MATLAB, SQL



HONORS & AWARDS

- Awarded **EU Marie Sklodowska-Curie Actions (MSCA ITN) Grant** - Horizon 2020
- Awarded Merit Certificate at IST for the academic years 16/17 and 17/18
- Awarded 2 Erasmus travel grant (2016 - Istanbul, 2018 - London)

WORK EXPERIENCE

Heart Genetics

Internship - Data scientist

2017 Lisbon, PT

Put to practice skills in Machine Learning, statistics and R by studying correlations of imputed variants with real genetic data.

Champalimaud Foundation

Internship - Research Assistant

2015 Lisbon, PT

Gave support to two PhD projects in Renart's Lab

AIESEC India

International Volunteering

2015 Ahmedabad, In

PROJECTS

Sklearn - RVM

- Created and maintain an open-source Relevance Vector Machine (RVM) implementation in python, fully compatible with scikit-learn, which currently does not provide the algorithm.

ModelZoom

- Developed a space of machine learning algorithms that, by means of Bayesian Optimization, finds the optimal models to solve any dataset in a small number of iterations.

GANxEEG

- Using styleGAN, created a continuous space of artificially generated faces. By collecting and processing EEG data in real-time, we are able to navigate the space to find the stimulus (face) that elicits the bigger signal.

Cognitive Tablet Battery

- Developed a tablet battery of 15 cognitive tasks aimed at phenotyping children with ASD.
